

Front Range Soaring Area

- Public Airport
- Private Airport
- Landout Place?
- Emergency Field
- 14er Peak
- Major Waypoint
- Waypoint
- Minor Waypoint

Label codes (after question marks of airport and field labels) indicate likely hazards:
l = insufficient length
w = insufficient width
s = uneven surface
^ = ground obstacles
/ = slope
a = hazardous approach
@ = difficult road access
Important: the absence of hazard codes does not imply the absence of hazards! Landing away from public airports may be trespassing and is inherently dangerous, possibly resulting in property damage, injury, or death. The condition of fields changes all the time.

Not Suitable for Navigation!
Landout Places CANNOT BE TRUSTED AND SHOULD NOT BE USED without prior on the ground verification by the pilot!
USER ASSUMES ALL RISK OF USE!
